49637	7590	02/15/2008	EXAMINER	
BERRY & ASSOCIATES P.C. 9255 SUNSET BOULEVARD SUITE 810 LOS ANGELES, CA 90069			SIDDIQI, MOHAMMAD A	
ART UNIT	PAPER NUMBER	2154		
MAIL DATE	DELIVERY MODE	02/15/2008 PAPER		

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/872,451	Applicant(s) LENNIE ET AL.
	Examiner MOHAMMAD A. SIDDIQI	Art Unit 2154

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(o).

Status

1) Responsive to communication(s) filed on 06 November 2007.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-9, 11-22, 24-28 and 30-33 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-9, 11-22, 24-28 and 30-33 is/are rejected.

7) Claim(s) _____ is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:

1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) Information Disclosure Statement(s) (PTO/SB/08)

Paper No(s)/Mail Date _____

4) Interview Summary (PTO-413)
Paper No(s)/Mail Date _____

5) Notice of Informal Patent Application

6) Other: _____

/Nathan J. Flynn/

DETAILED ACTION

1. Claims 1-9, 11-22, 24-28, and 30-33 are presented for examination.

Claims 10, 23, and 29 has been cancelled.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-9, 11-22, 24-28, and 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al. (6,850,757) (hereinafter Watanabe) in view of Mousseau et al. (US PUB 2002/0120696) (hereinafter Mousseau).

4. As per claims 1 and 27, Watanabe discloses a communication system and method for pushing electronic messages to a wireless portable device (arrival notification message is pushed by notification apparatus, col 2, lines

Art Unit: 2154

54-60; col 5, lines 6-31) to advise a user when an electronic message is received and to provide the user with a subset of the electronic message to allow the user to download electronic message of interest for viewing at the wireless portable device (col 2, lines 54-60; col 5, lines 6-31), comprising: a mail server (102, fig 1) having an electronic mail interface configured to be coupled to the internet (104, fig 1, col 2, lines 48-60), for storing an electronic mail message received over the Internet (col 2, lines 37-60) and for generating a copy of said electronic mail message (Fig 1, col 2, lines 24-46);

a notifications server (100, fig 1, col 2, lines 24-36), coupled to said mail server (col 2, lines 24-36), and having a standard electronic mail protocol for receiving said copy of said electronic mail message as a standard formatted electronic mail message (100, fig 1, col 2, lines 24-53);

wherein said notifications server (100, fig 1, col 2, lines 24-60) is for automatically generating (arrival notification mail, col 2, lines 24-60), therefrom, a subset of said received copy of said electronic mail message (col 5, lines 6-31); and

wherein said notifications server (col 2, lines 24-60), upon generation of said subset (subset is interpreted as message, col 5, lines 6-31), is configured to automatically transmit without any user trigger (notification, col 1, lines 5-10; col 2, lines 54-67) said subset (subset is interpreted as

Art Unit: 2154

message, col 3, lines 33-35) to an identified wireless electronic device (col 5, lines 6-31) associated with a user that is the recipient of said received electronic mail message (cellular phone, col 5, lines 6-39), and wherein the user subsequently is able to select the subset (subset is interpreted as body of the text, col 6, lines 18-33) and thereby download the remainder of the electronic mail message (col 6, lines 17-44).

The "prior art" (or "the system of") of Watanabe teaches notification apparatus (100, fig 1,) generating and notifying arrival of notification mail message to the wireless device (col 2, lines 24-60) and further suggest adding couple of short sentences to the notification message (col 5, lines 22-31). Watanabe does not specifically disclose generating a copy of said electronic mail message, therefrom, a subset of said received copy of said electronic mail message. However, the Watanabe does teach notification apparatus (100, fig 1,) generating and notifying arrival of notification mail message to the wireless device (col 2, lines 24-60) and further suggest adding couple of short sentences to the notification message (col 5, lines 22-31). Mousseau generating a copy of said electronic mail message (page 7, paragraph #0070; page 8, paragraph #0076), therefrom, a subset of said received copy of said electronic mail message (page 7, paragraph #0070; page 8, paragraph #0076; and paragraph #0067). It would have been obvious to one of ordinary skill in the art at the time of

the invention was made to combine the teachings of Watanabe and Mousseau. The motivation (prior art of Watanabe at least suggests adding a couple of short sentence so user can determine whether the electronic mail should be read, col 5, lines 22-31, col 6, lines 18-33) would have been developing mail arrival notification system for notifying mobile user device extracted information from the original mail so user of the wireless device can determine whether the electronic mail should be read.

5. As per claim 14, the claim is rejected for the same reasons as claim 1, above. In addition, Watanabe discloses a plurality of wireless electronic devices operable to communicate over a wireless communication network (106, fig 1, col 2, lines 24-60).

6. As per claims 2, 15, and 28, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses said identified wireless electronic device is operable to display received subsets to a user LCD display, (col 5, lines 29-31).

7. As per claims 3, and 16, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses said identified wireless electronic device is operable to allow said user to select a particular received

subset and wherein said notifications server is also for transmitting the remainder of an electronic mail message corresponding to said particular received subset in response to the selection thereof by said identified wireless electronic device (col 5, lines 45-67; col 6, lines 18-43).

8. As per claims 4 and 17, claims are rejected for the same reasons as claim 1, above. In addition Mousseau discloses said subset is a notification message comprising a sender's identification and a subject field of said received electronic mail message (page 8, paragraph #0076).

9. As per claims 5 and 18, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses said identified wireless electronic device is a handheld computer system having wirelessly enabled (fig 3, col 3, lines 28-36).

10. As per claims 6, 19, and 31, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses wherein said notifications server comprises a user information database for providing a mapping between wireless electronic devices and their associated electronic mail addresses (fig 3, col 3, lines 28-36).

Art Unit: 2154

11. As per claims 7, 20 and 32, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses a push packet (is used by said notifications server to wirelessly transmit said subset to said identified wireless electronic device (col 5, lines 22-28).
12. As per claims 8 and 21, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses said subset is wirelessly transmitted using a wireless LAN communication network (elements of fig 1).
13. As per claims 9 and 22, claims are rejected for the same reasons as claim 1, above. In addition Mousseau discloses, using a short range wireless communication network (page 22, paragraph #0174).
14. As per claims 11, 24, and 33, claims are rejected for the same reasons as claim 1, above. In addition Mousseau discloses said standard electronic mail protocol is substantially compliant with the SMTP protocol (page 9, paragraph #0084).

Art Unit: 2154

15. As per claims 12 and 25, claims are rejected for the same reasons as claim 1, above. In addition Mousseau discloses POP protocol (page 9, paragraph #0084).

16. As per claims 13 and 26, claims are rejected for the same reasons as claim 1, above. In addition Mousseau discloses IMAP protocol (page 9, paragraph #0084).

17. As per claim 30, claims are rejected for the same reasons as claim 1, above. In addition, Watanabe discloses said identified wireless electronic device allowing said user to select a particular received notification message including the subset (col 5, lines 22-67; col 6, lines 18-43); and said notifications server transmitting the remainder of an electronic mail message corresponding to said particular received notification message in response to said user selecting said particular received notification message (col 5, lines 45-67; col 6, lines 18-43).

Response to Arguments

18. Applicant's arguments filed 11/06/2007 have been fully considered but they are not persuasive, therefore a rejection to claims 1-9, 11-22, 24-28, and 30-33 is maintained.
19. In response applicant argued that:

Argument: Watanabe does not teach user receiving a subset of the email which allows the user to view the contents of the email.

Response: Watanabe discloses notification apparatus (100, fig 1,) generating and notifying arrival of notification mail message to the wireless device (col 2, lines 24-60) and further suggest adding couple of short sentences to the notification message (col 5, lines 22-31). Mousseau generating a copy of said electronic mail message (page 7, paragraph #0070; page 8, paragraph #0076), therefrom, a subset of said received copy of said electronic mail message (page 7, paragraph #0070; page 8, paragraph #0076; and paragraph #0067). It would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Watanabe and Mousseau. The motivation

Art Unit: 2154

(prior art of Watanabe at least suggests adding a couple of short sentence so user can determine whether the electronic mail should be read, col 5, lines 22-31, col 6, lines 18-33) would have been developing mail arrival notification system for notifying mobile user device extracted information from the original mail so user of the wireless device can determine whether the electronic mail should be read. receiving a subset of the email which allows the user to view the contents of the email.

Conclusion

20. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

Art Unit: 2154

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MOHAMMAD A. SIDDIQI whose telephone number is (571)272-3976. The examiner can normally be reached on Monday -Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
